Ruben and Mark,

Please see attached laboratory results for the monthly sampling at Arkwood: 40.5 ppb PCP at the mouth and 2.12 ppb PCP at the weir.

Jean

Jean,

Attached are the sample results from the monthly sampling event conducted for January 2013. Please note that the mouth analysis has been flagged as estimated due to failure in a surrogate recovery as discussed on page 2 of the report. The weir sample was collected approximately 12 feet from the discharge point. Debris was still observed at the sampling locations for both the mouth and weir but to a lesser degree than was observed last month.

If you have any questions, please let me know.

Best Regards,

Jim
